

PHOENIX BATS

PRO-APPROVED BATS: BASEBALL

Rock Maple, Yellow Birch or Northern White Ash - every wood bat we make, regardless of the level of play, is crafted on the most advanced, most consistent bat making machine *anywhere*. Phoenix bats start from pro quality wood; each piece hand graded for quality and extra durability.

2.5" or larger barrel, -3 min. drop weight, 31", 32"- 35" (1/2" increments), High school, BBCOR & Pro approved

WHICH WOOD? It's about the mis-hits!

Get jammed? Go Maple.

Hit off the end? Go Ash.

All over the place? Go Birch.

Nail it? Maple has the most pop.

BB71 CONTACT HITTER'S CHOICE (-3) Lighter bat, slight flare handle. Get on base so you can score.

JK5 BB71 WITHOUT THE FLARE (-3) Same contact hitter's barrel but straighter handle to knob.

F110 THICKER HANDLE, GAP HITTER (-2.5) Great for big hands & heavy grip-tape users. Balanced.

P2 GAPPER WITH MORE ALL-AROUND (-2.5) A bit more barrel, handle & flare but well balanced.

R141 PLAYER & TEAM CHOICE (-2.5) Well-balanced and versatile. Hit the gaps and bombs.

W241 BIG 'OLE FLARED KNOB (-2.5) With a R141 barrel. Evenly weighted to drive it!

MC5S METAL BAT HANDLE & KNOB (-2.5) Straight handle into very defined knob for the gap hitter.

R318 POWER PLUS BAT SPEED (-2.5) Spring training favorite: longer barrel/straighter handle.

NP13 POWER BUT LESS WEIGHT (-2.5) Bigger barrel, but not V243 big; slightly flared handle.

V243 BIG HITTER'S CHOICE (-2) Biggest barrel, end-weighted. It's all about the long ball.

NK43 KNOBLESS BIG HITTER'S BAT (-2) Same design as the V243 except flares out with no knob.

B455 BIG BAT, LESS END-WEIGHT (-2) Less top heavy than the V243, but still a big barrel.

P161 OLD SCHOOL (-2) Big barrel, thickest handle for added durability. Good balance for a big bat.
